Marco Tignanelli

Buenos Aires, Argentina • mark-kus.com • +54 9 02325 6562 17 • tignanellimarco@gmail.com

Full Stack Web Developer with experience in building scalable applications using Python, FastAPI, React, and Next.js. Skilled in optimizing development processes and delivering production-ready solutions with measurable business impact.

Professional Experience

EPAM Systems   *March 2024 – September 2025*
Software Engineer

- Developed a full-stack application to generate personalized meal plans, including an admin dashboard for user and supplier management.
- Refactored a RESTful API, normalized database structures, and optimized React state management, reducing code size by more than 20% and improving maintainability.
- Coordinated team efforts, improving development workflows, and ensuring on-time delivery.
- Mentored a team member into key technologies and side libraries for better code quality and task delegation

Vates Software   *August 2023 – March 2024*
Full Stack Developer

- Built two key applications for internal operations: a commission calculation system and a weighted quality index platform.
- Designed and implemented backend APIs with Python, FastAPI, and PostgreSQL to compute performance metrics.
- Collaborated in front-end development using React and Next.js, converting Figma designs into pixel-perfect user interfaces.
- Delivered features following Scrum best practices, enabling faster iterations and efficient project outcomes.

Hueney Ruca   *April 2023 – May 2023*
Full Stack Developer

- Developed an e-commerce web platform for vacation rentals with booking, payments, and an admin dashboard.
- Built the product using Next.js and Supabase, ensuring fast delivery through Scrum methodology.

Education

National Technological University   Buenos Aires, Argentina
Bachelor's in Information Systems Engineering   *April 2024 – December 2029*

SoyHenry Bootcamp   Remote
Full Stack Web Development   *February 2023 – April 2023*

Additional Skills

- Spanish (Native), English (Fluent), Portuguese (Basic)
- Officially certified in Full Stack Web Development, Docker, K8s, Python, FastAPI, and Scrum
